ABOUT US

Athens University is the oldest and largest University in Greece. Since 12 years a very intensive Master of Bioinformatics is taking place with great success. We would like to expand our activities in Europe via clustering.

AREAS OF ACTIVITY

SERVICES

- Education
- Research
- Consultancy

TECHNOLOGIES

- Biotechnology

Master in Bioinformatics in Athens University

We are offering a well organized program of Master in Bioinformatics particularly focused solving basic biological questions in the area of proteins.

OWN EXPERTISE AND KEYWORDS

Our expertise is a number of algorithms on prediction of protein structure and function and aggregation prone properties of proteins involved in amyloidogenesis.

PROJECT IDEAS

Cooperation is master program bioinformatics clustering in East Europe and Balkan room as well as South East Mediterranean area. The possibility to co-organize summer schools in Greece.

TYPE OF PARTNER SOUGHT

People from the education and research bodies.
