ABOUT US

The **Center for Technology Research and Innovation (CETRI)** belongs to a high tech interdisciplinary research group and has close collaboration with various institutions spread all over Europe.

The main purpose of CETRI is to provide engineering excellence and innovation management, which is efficiently achieved by offering cost effective solutions for entrepreneurs, independent enterprises and academic institutions. Our main scope is to help companies and public institutions to implement technological innovations as well as to help them find the appropriate european funding for them. **CETRI** was founded by a group of professionals and academics who collaborated together for years at established technology research institutions and have built on that experience to provide great service and insight to help clients navigate the technology and innovation landscape. **CETRI** is in close collaboration with companies and public institutions, all around Europe, in the implementation of technological innovations area, enabling them to strengthen their competitive position over long-term. It is our aim to find concrete solutions to the real challenges facing European entrepreneurs. Moreover, **CETRI** has participated **invarious R&D projects** with partners from all over Europe.

Our research team is interested in developing, participating and coordinating proposals under the ICT, Transport, Energy, SME, Materials, FoF and other H2020 calls. The multidisciplinary technological and experienced capacity of the organization allows the implementation of a variety of projects in different scientific fields.

Our advisory team can provide consulting services regarding Proposal Writing, Innovation Management and Product Development to various Private or Public entities from various sectors.

CETRI is also interested in research collaborations for EU funded projects and writing proposals under Horizon 2020.
