

## Partner offer (competences/expertise)

The innovative cold storage system for civil application, developed and patented by the company Upgrading Services for civil application, allows the air conditioning system operating at constant power (peak shaving concept), thus improving the chiller efficiency and the electrical grid management. We can provide the technology, integrating it in a smart grid system or in a building.

## Topics

EE-01-2017:

Waste heat recovery from urban facilities and re-use to increase energy efficiency of district or individual heating and cooling systems

EE-03-2016.:

Standardized installation packages integrating renewable and energy efficiency solutions for heating, cooling and/or hot water preparation

EE-04-2016-2017.:

New heating and cooling solutions using low grade sources of thermal energy
