

## Partner offer (competences/expertise)

Enviroplan S.A. participates in the operating agents in several waste management facilities and its staff has experience in research projects related to biofuel production. Therefore Enviroplan S.A. has access to several types of treated waste that can be used as feedstock for biofuel production. Permanent staff of Enviroplan S.A. has considerable experience in research on biomass conversion to biofuels and on waste to energy technologies. All the above justifies that Enviroplan S.A. can offer added value to a consortium that will propose a project in the context of topics LCE-08, LCE-19 and LCE-21.

## Topics

LCE-08-2016-2017.:

Development of next generation biofuel technologies

LCE-19-2016-2017.:

Demonstration of the most promising advanced biofuel pathways

LCE-21-2017.:

Market uptake of renewable energy technologies
