ABOUT US

ITTI is a non-governmental, non-profit organization, a registered alliance, according to the Law for Judicial Entities with Non-profit Purposes. The Institute for Technology Transfer and Innovations (ITTI) works toward the creation and the development of a national innovation infrastructure, the spreading of new knowledge, the stimulation of technological entrepreneurship, the transfer of knowledge and technologies and the market application of innovative products. The activities of the Institute serve as a mechanism for the development and financing of research, development and application of innovations. Critical focus in the work of the Institute is the development of cooperation between the business and the scientific community. Its services fall into these categories:

- Intermediation in technology transfer;
- Services (Financial, Strategic, Legal, etc.), related to searching and finding technologies, know-how, IP (intellectual property), patents, and beneficial models;
- Financing or investment mediation when realizing new and starting companies (start-ups);
- Assistance in developing new teams and companies – management consulting;
- Participation in the preparation and management of projects, programs, analyses and strategies – EU and others – that are related to innovations;
- Other assistance and activities, related to innovations;
- Creation and maintenance of information database with innovations.

ITTI is operating as:

1. a consulting company that assists third parties- SMEs, institutes, clusters, UNIs, municipalities, NGOs, etc- in, in general, fundraising, in drawing up and managing their research, innovation, training or partnerships projects;
2. a direct beneficiary or a partner of third-parties of European measures under the Bulgarian national operational programmes or directly in EC
