

Poland, EE-11-2016/2017

Our Centre is a research institute validated by the EC in H2020. We're managing Renewable Energy Cluster of Central Poland (Bioenergy for the Region Cluster), comprising over 80 research institutes, business support institutions, SMEs, and local authorities. The main field of the cluster's activity is energy efficiency and renewable energy. In June 2014 we opened the Centre of Technology Transfer in the field of Renewable Energy Sources, which is the first research institution of this kind in Poland.

We have a following expertise in the area:

Accreditation of Polish Office of Technical Inspection (UDT) to conduct training schemes on BIPV
Energy Performance Auditing of buildings

Our possible contributions are:

Support to consumers or end-users (e.g. Energy auditing)
Links with National Qualification Platform in PL

Topics

EE-11-2016/2017:

Overcoming market barriers and promoting deep renovation of buildings

EE-13-2016:

Cost reduction of new Nearly Zero-Energy buildings

EE-14-2016-2017:

Construction skills
