

## Partner offer (competences/expertise)

Revolve is a communications agency dedicated to accelerating the energy transition and fostering cultures of sustainability. Our added value in H2020 consortia is to design and implement tailored communications strategies that meet the requirements of the H2020 funding scheme, in terms of knowledge transfer and dissemination, explicitly requested now by the European Commission's funding criteria.

Integrating a professional agency in project consortia is essential to ensure high-quality communication deliverables, optimize the project's outreach and gain strategic positioning in accessing EU funds. The professionalization of communication activities in H2020 projects is a key priority for the European Commission in order to better select project proposals that integrate comprehensive and well-structured communications plans.

Revolve Media is already partnering in H2020 projects and leads the "Knowledge Transfer and Dissemination" work package for the INHERIT project (H2020-PHC-04-2015). In developing websites, stakeholder databases and communication tools from press and digital marketing campaigns to reports and events, we can boost the project's visibility and impact. At the crossroads of communications and sustainability, we design accurate messages and effectively communicate them to the right audiences.

### Services:
