ABOUT US

The Italian Association of Road Safety Professionals AIPSS (www.aipss.it) has been established on 2009 as a not-for-profit research association, to promote road safety best practices and to disseminate research results in this field.

Main Associates are the Research Center for Transport and Logistics of the university of Rome "La Sapienza"; the Engineering department of the third university of Rome "ROMATRE", the Lazio (Italian Region) Road managing company ASTRAL, The engineering company NET Engineering, together with many other stakeholders.

AIPSS is member of the Global Alliance of NGOs for Road Safety (www.roadstafetyngos.org), an umbrella organisation active in more than 100 countries worldwide.

Due to the high expertise and qualification of its associates, AIPSS is involved in many road safety research activities, as well as in dissemination and training ones: the Association translated in Italian the English Version of the "Safety Prevention Manual for Secondary Roads", developed under the EU financed project "Pilot4Safety" (<http://pilot4safety.fehrl.org>), with the active participation of many AIPSS members.

AIPSS is the promoter and partner of the ECORoads project (www.ecoroadsproject.eu), currently running under the H2020 programme.
