

## Partner offer (competences/expertise)

SPEED Development Consultants SA is an independent consultant company being active in Greece and abroad. The company was established in 1989 by a team of experienced and highly qualified professionals, specializing in the fields of strategic planning, technical – economical studies, implementation of development projects and programmes, environmental and energy management and project management. The company offers services to a wide range of clients, including the European Commission, national, regional and local authorities and organisations, as well as private and public enterprises. Regarding the energy and environmental sectors, SPEED has great expertise and has materialized a great number of energy and environment related projects, most of which financed by EU in the framework of ALTENER, SAVE, ECOS –OUVERTURE and THERMIE B Programmes (energy sector) and LIFE, EUROMANAGEMENT, INTERREG, MEDA/EUMEDIS, LEONARDO DA VINCI(environment sector). The energy sector projects materialized regard: (a) regional / energy planning for the exploitation of energy resources and RES for various regions and Prefectures in Greece, (b) support to local / regional energy centres for their foundation, operation and interconnection, (c) demand side management both in national and local level (schools, hospitals, public buildings and public lighting), (d) feasibility and financing studies for energy projects on the exploitation of RES, CHP etc. in both European and local level, (e) support to the promotion and dissemination of energy technologies in national and interregional level and (f) application planning in the energy sector, which includes consulting services, studies and engineering studies on the exploitation of RES for a number of applications and installations. SPEED SA at present is a partner in the IEE project “STEP-by-STEP renovation towards nearly zero energy SPORT buildings” (<http://step2sport.eu/sport/>), was a partner in the IEE project “GPWIND Good Practice in reconciling onshore & offshore WIND energy with environmental objectives” (<http://www.project-gpwind.eu>) which ended in October 2012 and has also conducted a research project on the “Energy consumption standards of the Greek households – Household Energy Profile”.
