

Spain, EE-07-2016-2017

Gamma Solutions is a multinational Spanish SME with headquarters in Spain (Madrid&Cáceres), UK (London&Exeter) and Latin America. It is a technological company specialized in developping innovative and practical solutions for Energy and ICT.

Regarding the Energy sector, Gamma performs:

- Turnkey projects: PV solar farms and rooftops. O&M of power plants and facilites.
- Energy audits (IPMVP Certification by EVO)
- Multisource electrical supply guarantee (combining different energy sources, especially renewable ones - solar&wind)
- Energy asset Management systems: we have developped our own monitoring and control system which can be used in lighting, energy loads in buildings, PV power plants...

As an ICT provider and developer, Gamma offers:

- Fiber and WiFi deployment
- Radio spectrum measurement and control
- Software (web and app) and hardware development

As a partner, we can offer:

- Several partner profiles integrated in a single company: engineering entity, energy expert, end-user (we own PV power plants in which we can perform tests at real scale), ICT developer and hardware installation partner,
- Possibility of working from two different countries: Spain & UK
- Deep experience in energy assets management
- Expertise in NFC and PLC communications and development of an own integrative software platform.
- Personnel specialized in user experience for apps development.
- Good relationships with Local Authorities, Public entities and Government or Public administrations from previous and current services
- Enthusiasm and dedication to work!
