

## Spain, SCC-1 - 2016/2017

Gamma Solutions is a multinational Spanish SME with headquarters in Spain (Madrid&Cáceres), UK (London&Exeter) and Latin America. It is a technological company specialized in developing innovative and practical solutions for Energy and ICT.

Regarding the Energy sector, Gamma performs:

- Turnkey projects: PV solar farms and rooftops. O&M of power plants and facilities.
- Energy audits (IPMVP Certification by EVO)
- Incorporation of Renewable Energy Sources with back-up fuel energy for a multisource energy supply guarantee.
- Energy asset Management systems: we have developed our own monitoring and control system which can be used in lighting, energy loads in buildings, PV power plants...

As an ICT provider and developer, Gamma offers:

- Fiber and WiFi deployment
- Radio spectrum measurement and control
- Software (web and app) and hardware development
- Smart metering management
- ICT Platforms: inclusion of Data structures and API

As a partner, we can offer:

- Several partner profiles integrated in a single company: Engineering entity, Installation technician, ICT Developer, Energy Expert and supplier, End-user/Tester...
- Possibility of working from two different countries: Spain & UK
- Deep experience in real-time energy assets management:
- Renewable Energy Sources Integration (solar & wind) and back-up energy (interoperability) for multisource energy supply guarantee. Smart Grids.
- Expertise in NFC and PLC. Secured communications.
- Development of an own integrative software platform using cloud computing and big data analysis.
- Personnel specialized in user experience for apps development. Strong consumer-oriented approach.
- Good relationships with Local Authorities, Public entities and Government or Public administrations from previous and current services --> able to seek active participation.
- Enthusiasm and dedication to work!
